

## Typical Product Specifications & Properties

# 2-Benzylidenecyclohexanone

CAS Number: : 5682-83-7

| Specifications   | Limits                            |
|------------------|-----------------------------------|
| Molecular weight | 186.25                            |
| EINECS           | 227-144-9                         |
| SMILES           | <chem>O=C1CCCCC1=Cc2ccccc2</chem> |
| Flash Point      | 180-184&deg;C/14mm                |
| Boiling Point    | 180-184&deg;C 14mm                |
| BRN Number       | 638548                            |
| Melting Point    | 53-55&deg;C                       |
