## Typical Product Specifications & Properties

# 4-Vinylguaiacol

CAS Number: : 7786-61-0

| Specifications      | Limits                         |
|---------------------|--------------------------------|
| Molecular weight    | 150.17                         |
| EINECS              | 232-101-2                      |
| BRN Number          | 2044521                        |
| Boiling Point       | 224 &deg;C                     |
| Form                | neat                           |
| FEMA                | 2675   2-METHOXY-4-VINYLPHENOL |
| Density             | 1.11 g/mL at 25 &deg;C         |
| Flash Point         | >230 &deg;F                    |
| Water solubility    | Miscible with water.           |
| Refractive Index    | 1.582                          |
| Melting Point       | 25-29&deg;C                    |
| Storage Temperature | 2-8&deg;C                      |
