

## Typical Product Specifications & Properties

# Acetyl Glucosamine

CAS Number: :

Specifications	Limits
Chemical Structure	 <p>The image shows the chemical structure of Acetyl Glucosamine, a disaccharide derivative. It consists of a glucose molecule linked to an acetamido group. The structure is shown in a chair conformation with the acetamido group at the C2 position. The acetamido group is represented as -NH-C(=O)-CH<sub>3</sub>. The glucose ring has hydroxyl groups at C1, C3, and C6, and a hydroxymethyl group at C5. The structure is overlaid with a watermark logo for 'parchem fine &amp; specialty chemicals'.</p>
