## Typical Product Specifications & Properties

# Adipic Acid FCC

CAS Number: : 124-04-9

| Specifications   | Limits                                 |
|------------------|--|
| Density          | 1.360 (254 c)                          |
| Slightly Soluble | in water                               |
| Very Soluble     | in alcohol                             |
| Melting Point    | 152 c                                  |
| Odor             | wh. monoclinic prisms, pract. odorless |
| Vapor Pressure   | 1 mm hg (159.5 c)                      |
| Molecular weight | 146.16                                 |
| Flash Point      | (cc) 385 f                             |
| Solubility       | acetone, oxygenated solvs.             |
| Boiling Point    | 337.5 c                                |
