Typical Product Specifications & Properties

Diphenylamine

CAS Number: : 122-39-4

Specifications	Limits
Density	1.159 (20 c)
Practically Insoluble	in water
Very Soluble	in ethanol, propanol, ccl4
Boiling Point	0.20% max (High Boiling Point)
Content	0.07% max (Aniline)
Reaction Test	Neutral (Water)
Boiling Point	0.30% max (Low Boiling Point)
Odor	floral odor
Vapor Pressure	1 mm hg (108.3 c)
Melting Point	52.9 c
Molecular weight	169.24
Flash Point	(cc) 153 c

Specifications	Limits
Solubility	benzene, ether, glac. acetic acid, cs2, oxygenated and aromatic solvs.
Appearance	White, Light Yellow or brown particle
Purity	99.70% min (Diphenylamine)
Freezing Point (°C)	52.60 min
Moisture	0.2% max
Color	discolors in light
Chemical Structure	H.N. Decidence of the special
