

## Typical Product Specifications & Properties

# Butyl-Triphenyl-Phosphanium Chloride

CAS Number: : 13371-17-0

Specifications	Limits
Chemical Structure	 <p>The image shows the chemical structure of Butyl-Triphenyl-Phosphanium Chloride. It consists of a central phosphorus atom (P) with a positive charge, bonded to three phenyl rings and one butyl chain. A chloride ion (Cl<sup>-</sup>) is shown as the counterion. The structure is overlaid on a watermark for 'parchem fine &amp; specialty chemicals'.</p>
