

Typical Product Specifications & Properties

Calcium Monoethyl Fumarate

CAS Number: :

Specifications	Limits
Chemical Structure	 <p>The image shows the chemical structure of Calcium Monoethyl Fumarate. It features a central trans-fumarate backbone. One of the carboxylic acid groups is esterified with an ethyl group (CH₂CH₃), and the other is in its calcium salt form (Ca²⁺). The structure is overlaid with the Parchem logo and the text 'parchem fine & specialty chemicals'.</p>
