

Typical Product Specifications & Properties

Calcium Oxide

CAS Number: : 1305-78-8

Specifications	Limits
Density	3.40
Practically Insoluble	in alcohol
Melting Point	2570 c
Odor	wh. or gray cryst. or powd., odorless
Molecular weight	56.08
Solubility	water forming ca(oh)2 and generating heat
Boiling Point	2850 c
Chemical Structure	 <p>The image shows the Parchem logo, which consists of two interlocking circles. Below the logo is the text "o=Ca" in red, followed by the word "parchem" in a large, light blue font, and "fine & specialty chemicals" in a smaller, light blue font below it.</p>
