

Typical Product Specifications & Properties

Di Ethylene Glycol Di Methacrylate

CAS Number: : 2358-84-1

Specifications	Limits
Density	1.082
Odor	ester-like odor
Molecular weight	242.27
Color	colorless liquid
Flash Point	230 f
Boiling Point	134 c (2 mm)
Chemical Structure	 <p>The chemical structure diagram shows a central diethylene glycol molecule, represented as a chain of four carbon atoms with two oxygen atoms in the middle (HO-CH2-CH2-O-CH2-CH2-OH). Two methacrylate groups are attached to the terminal carbon atoms of this chain. Each methacrylate group consists of a carbon atom double-bonded to a methyl group and single-bonded to a methoxy carbonyl group (-COOCH3). The diagram is overlaid with the Parchem logo and the text 'fine & specialty chemicals'.</p>
