## Typical Product Specifications & Properties

# Diallyl Dicarbonate

CAS Number: : 115491-93-5

| Specifications      | Limits                                                                                                                                     |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| Molecular weight    | 186.16                                                                                                                                     |
| Flash Point         | 201 &deg;F                                                                                                                                 |
| Boiling Point       | 60 &deg;C/0.05 mm Hg                                                                                                                       |
| Storage Temperature | 2-8&deg;C                                                                                                                                  |
| Density             | 1.121 g/mL at 25 &deg;C                                                                                                                    |
| Refractive Index    | 1.434                                                                                                                                      |
