Typical Product Specifications & Properties

Dicreatine Malate

CAS Number: : 813-80-2

Specifications	Limits
Chemical Structure	 <p>The image displays the chemical structure of Dicreatine Malate. It consists of two creatine molecules (2-amino-3-guanidinopropionic acid) linked to a malate molecule (2-hydroxybutanedioic acid). The creatine molecules are shown in a light blue color, and the malate molecule is shown in a light red color. The structure is overlaid on a large, faint 'parchem' logo in the background.</p>
