## Typical Product Specifications & Properties

# Diethyl Sulfit

CAS Number: : 623-81-4

| Specifications               | Limits                                    |
|------------------------------|---|
| Molecular weight             | 138.19                                    |
| EINECS                       | 210-815-5                                 |
| SMILES                       | S(OCC)(OCC)=O                             |
| InChI                        | 1S/C4H10O3S/c1-3-6-8(5)7-4-2/h3-4H2,1-2H3 |
| InChIKey                     | NVJBFARDFTXOTO-UHFFFAOYSA-N               |
| Boiling Point                | 158 &deg; C                               |
| Atmospheric OH Rate Constant | 1.64E-12 cm <sup>3</sup> /molecule-sec    |
| log P (octanol-water)        | 0.990                                     |
| Density                      | 1.077 g/mL at 25 &deg;C                   |
| Refractive Index             | 1.414                                     |
| Storage Temperature          | Flammables area                           |
| Flash Point                  | 129 &deg;F                                |
