

# Typical Product Specifications & Properties

## Ethylenediamine Tetra-Acetic Acid

CAS Number: :

Specifications	Limits
Chemical Structure	 <p>The image displays the chemical structure of Ethylenediamine Tetra-Acetic Acid (EDTA). It features a central ethylenediamine molecule (H<sub>2</sub>N-CH<sub>2</sub>-CH<sub>2</sub>-NH<sub>2</sub>) with four acetic acid groups (CH<sub>3</sub>-COOH) attached to the nitrogen atoms. The structure is overlaid with a large, faint 'P' logo and the 'parchem' brand name, with the tagline 'fine &amp; specialty chemicals' below it.</p>
