

Typical Product Specifications & Properties

Hexoxyethyl Acrylate

CAS Number: : 24260-57-9

Specifications	Limits
Chemical Structure	 <p>The image shows the chemical structure of Hexoxyethyl Acrylate, which consists of a six-carbon alkoxy chain (hexoxy) attached to an ethyl group, which is in turn attached to an acrylate moiety. The structure is drawn in a skeletal format with red oxygen atoms and a double bond in the acrylate group. Below the structure is the Parchem logo, which features a stylized circular emblem above the word 'parchem' in a lowercase sans-serif font, with the tagline 'fine & specialty chemicals' underneath.</p>
