

Typical Product Specifications & Properties

L-Carnitine Fumarate

CAS Number: : 90471-79-7

Specifications	Limits
Chemical Structure	 <p>The image displays two chemical structures. The top structure is L-carnitine, a trimethylammonium salt of 3-hydroxybutanoic acid, shown with a methylammonium group and a hydroxyl group. The bottom structure is fumarate, the trans isomer of the conjugate base of fumaric acid, shown as a trans-butenedioate ion. A watermark for 'parchem fine & specialty chemicals' is visible over the structures.</p>
