

## Typical Product Specifications & Properties

# Myomodulin B

CAS Number: : 137362-30-2

Specifications	Limits
Chemical Structure	 <p>The image shows the chemical structure of Myomodulin B, a complex polycyclic molecule. It features a central benzene ring fused to a five-membered ring containing an oxygen atom, and another five-membered ring containing a nitrogen atom. There are several hydroxyl groups attached to the structure. The structure is overlaid with a watermark for 'parchem fine &amp; specialty chemicals'.</p>
