## Typical Product Specifications & Properties

# n-Aminoethylpiperazine

CAS Number: : 140-31-8

| Specifications             | Limits                 |
|----------------------------|------------------------|
| Density                    | 0.9837                 |
| Total Amine Value          | Approx. 1,300 mg KOH/g |
| Color (APHA)               | 50 Maximum             |
| Water                      | 0.5% wt. Maximum       |
| Relative Density (20/20°C) | 0.986                  |
| AEP Content                | 98.0% wt. Minimum      |
| Boiling Point at 1.33 kPa  | 100°C                  |
| Appearance                 | Clear Solution         |
| Freezing Point             | -18°C                  |
| Boiling Point at 101.3 kPa | 222°C                  |
| Viscosity at 20°C          | 15 mPa.s               |
| Vapor Pressure at 20°C     | 8 Pa                   |

| Specifications   | Limits                       |
|------------------|------------------------------|
| Freezing Point   | -18°C                        |
| Total Nitrogen   | 32.5% wt.                    |
| Refractive Index | 1.499                        |
| Molecular weight | 129.24                       |
| Color            | colorless or pale yel liquid |
| Flash Point      | 200 f                        |
| Solubility       | water                        |
| Boiling Point    | 222.0 c                      |
