

## Typical Product Specifications & Properties

# N-Methyl-N-benzylethanolamine

CAS Number: : 101-98-4

Specifications	Limits
Chemical Structure	 <p>The chemical structure of N-Methyl-N-benzylethanolamine is shown. It consists of a benzene ring attached to a nitrogen atom. The nitrogen atom is also bonded to a methyl group and an ethanol group (CH<sub>2</sub>CH<sub>2</sub>OH). The structure is overlaid with a watermark logo for 'parchem fine &amp; specialty chemicals'.</p>
