

Typical Product Specifications & Properties

N,N-Dimethylaminopropylacrylamide

CAS Number: : 3845-76-9

Specifications	Limits
Chemical Structure	 <p>The image shows the chemical structure of N,N-Dimethylaminopropylacrylamide. It features a central carbon atom double-bonded to a vinyl group (CH2=CH-) and single-bonded to a propyl group (-CH2-CH2-CH3) and a dimethylamino group (-N(CH3)2). The amide group (-CONH-) is attached to the propyl chain. The structure is overlaid with the Parchem logo and the text 'parchem fine & specialty chemicals'.</p>
