

## Typical Product Specifications & Properties

# Nimustine

CAS Number: : 42471-28-3

Specifications	Limits
Molecular weight	272.69
Chemical Structure	 <p>The chemical structure of Nimustine is shown. It features a central pyrimidine ring system. Attached to this ring are a chlorine atom (Cl), a carbonyl group (C=O), and a nitrogen atom (N) which is part of a side chain containing another nitrogen atom (N) and a chlorine atom (Cl). The structure is overlaid with a watermark for 'parchem fine &amp; specialty chemicals'.</p>
Assay/Purity	Typically NLT 98%
