## Typical Product Specifications & Properties

# oxamniquine

CAS Number: : 21738-42-1;

| Specifications     | Limits                                                                              |
|--------------------|-------------------------------------------------------------------------------------|
| Density            | 1.2±0.1 g/cm <sup>3</sup>                                                           |
| Boiling Point      | 443.6±45.0 °C at 760 mmHg                                                           |
| Vapor Pressure     | 0.0±1.1 mmHg at 25°C                                                                |
| Flash Point        | 222.1±28.7 °C                                                                       |
| Molecular weight   | 279.335                                                                             |
| Surface Tension    | 47.6±3.0 dyne/cm                                                                    |
| Refractive Index   | 1.560                                                                               |
