

## Typical Product Specifications & Properties

# Potassium Iodate

CAS Number: : 2139718

Specifications	Limits
Chemical Structure	 <p>The image shows the chemical structure of Potassium Iodate (KIO<sub>3</sub>). It features a central iodine atom (I) bonded to three oxygen atoms (O). One oxygen atom is double-bonded to the iodine, while the other two are single-bonded and carry a negative charge (O<sup>-</sup>). A potassium ion (K<sup>+</sup>) is shown nearby, representing the counterion. Below the structure is the Parchem logo, which consists of a stylized circular emblem above the word "parchem" in a lowercase sans-serif font, with the tagline "fine &amp; specialty chemicals" underneath.</p>
