

## Typical Product Specifications & Properties

# Sodium Bisulfate

CAS Number: :

Specifications	Limits
Chemical Structure	 <p>The image shows the chemical structure of sodium bisulfate (NaHSO<sub>4</sub>). It features a central sulfur atom (S) bonded to four oxygen atoms (O). One oxygen atom is bonded to a hydrogen atom (H), forming a hydroxyl group (-OH). Another oxygen atom is bonded to a sodium ion (Na<sup>+</sup>). The structure is presented with a watermark logo for 'parchem fine &amp; specialty chemicals' overlaid on it.</p>
