Typical Product Specifications & Properties

Sodium Chlorate

CAS Number: : 2146053

| Specifications | Limits |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Molecular weight | 106.44 |
| EINECS | 231-887-4 |
| Merck | 14,8598 |
| Water solubility | 1000 g/L (20 °C) |
| Melting Point | 248-261 °C |
| Solubility | water: soluble |
| Density | 2.49 |
| Stability | Stable. Mixtures of this material with organic fibrous or absorbent material and with a variety of other materials are potentially explosive. A full MSDS sheet must be consulted before use. Incompatible with strong reducing agents, organic mater |
| Storage Temperature | room temp |
