

Typical Product Specifications & Properties

Sodium Hypophosphite

CAS Number: :

Specifications	Limits
Chemical Structure	 <p>The image shows the chemical structure of sodium hypophosphite, $\text{NaH}_2\text{P}_2\text{O}_4$. It features a central phosphorus atom (P) bonded to two hydrogen atoms (H) and one oxygen atom (O). This phosphorus atom is also bonded to another phosphorus atom (P), which is in turn bonded to two oxygen atoms (O). A sodium ion (Na^+) is shown nearby. Below the structure is the Parchem logo, which consists of two interlocking loops and the text "parchem fine & specialty chemicals".</p>
