## Typical Product Specifications & Properties

# Sodium Nitrate

CAS Number: : 7631-99-4

| Specifications             | Limits                        |
|----------------------------|-------------------------------|
| Density                    | 2.267                         |
| Slightly Soluble           | in alcohol, oxygenated solvs. |
| Direct Evaporative Cooling | 380 c                         |
| Lead                       | 4 ppm Max.                    |
| Identification             | Positive (for Sodium)         |
| Identification             | Positive (for Nitrate)        |
| Total Chlorine Content     | To pass test                  |
| Assay                      | 99.0 - 100.5% (Dried basis)   |
| pH                         | 5.5-8.3 (5)                   |
| Odor                       | odorless                      |
| Melting Point              | 308 c                         |
| Molecular weight           | 85.01                         |
