Typical Product Specifications & Properties

Tetrahydro-N-[3-(methylamino)propyl]-2-furancarboxamide

CAS Number: :

Specifications	Limits
Chemical Structure	 <p>The chemical structure shows a furan ring with a carboxamide group at the 2-position. The nitrogen of the carboxamide is bonded to a 3-(methylamino)propyl chain. The furan ring is drawn in a perspective view, and the carboxamide group is shown with its carbonyl oxygen and hydrogen. The 3-(methylamino)propyl chain consists of three methylene groups and a terminal methylamino group. The entire structure is overlaid on a faint 'parchem fine & specialty chemicals' watermark.</p>
