

Typical Product Specifications & Properties

Trisodium Nitrilotriacetate

CAS Number: : 5064-31-3

Specifications	Limits
Molecular weight	257.10
Chemical Structure	 <p>The chemical structure shows a central nitrogen atom (N) bonded to three acetate groups. Each acetate group consists of a methyl group (CH₃) and a carboxylate group (COO⁻). The three carboxylate groups are each associated with a sodium ion (Na⁺), resulting in a trisodium salt. The structure is overlaid with a 'parchem' logo and the text 'fine & specialty chemicals'.</p>
