

## Typical Product Specifications & Properties

# Zanamivir

CAS Number: : 139110-80-8

Specifications	Limits
Molecular weight	332.3098
Chemical Structure	 <p>The image shows the chemical structure of Zanamivir, a neuraminidase inhibitor. It features a central pyridine ring substituted with a hydroxymethyl group, a hydroxyl group, a methyl group, and a diethylamino group. The pyridine ring is connected to a side chain containing a secondary amine, a methyl group, and a hydroxyl group. The structure is overlaid with a 'parchem fine &amp; specialty chemicals' watermark.</p>
Assay/Purity	Typically NLT 98%
